

Said Al-Habsi BIO

Fellow Electrical Engineering Diploma with 23 years of local and international professional experience including 15 years in Oil and Gas Operations and 8 years in manufacturing.

In 1999 Started my career with Transformers Manufacturer in Oman as Testing Engineer. In 2001 joined Schlumberger as Field service specialist Trainee and developed a solid Technical foundation by providing services (Artificial Lift Installation and Well Monitoring) to various Oil field operators in Oman, UAE, Yemen, and Qatar. 5 years later moved to Schamberger office in Muscat as Product champion / Sales involved in supporting sales and operation in Oman.

In 2010 moved to Gulf Energy as Sales Manager (Completion and Artificial Lift system) then promoted to General Manger for two start-up business Units, Completion and Artificial Lift unit and workover unit where we increased our workover hoist operation from 2 Units to 8 Units within 3 years.

2015 Promoted to be VP Oman- Operation looking after all Gulf Energy the business units in Oman.

Mid of 2016 I got an opportunity to move to Oman Chlorine as CEO (publicly listed company in Oman) with two subsidiaries in GCC (Qatar and UAE) and where a built a strong Knowledge in corporate governance where I am involved in the 3 boards and subcommittee meetings in all the 3 countries.

My philosophy is simply based on establishing customer focused plans and ensure disciplined execution and continuous alignment of those plans and the direction of the organization with the vision of Shareholders and advising them on critical success factors. Believe in leading, supporting, and facilitating team members in achieving their core objectives to succeed which builds positive team spirit that leads the overall team to success path.
